SUMMARY

- Dynamic and results-driven professional with a unique blend of engineering expertise and full-stack web development experience. Adept at leading projects, optimizing workflows, and delivering innovative solutions for diverse clients. Proven ability to bridge technical and strategic goals, ensuring excellence in every project.

WORK EXPERIENCE

CodeCollective IT Solutions: *Full-Stack Developer Intern*

07/2024 – 10/2024

- Developed an Information System for SK LYDO in Tupi, South Cotabato Philippines, enhancing administrative efficiency and enabling streamlined record management for local youth initiatives.
- Implemented a Sales Report feature in Polaris Rx Pharmacy's POS system using Jasper Reports, providing detailed and automated insights into sales performance for improved business operations.
- Developed a job app specifically designed for differently-abled individuals, making it easier for them to find job opportunities and connect with employers.

Full-Stack Web Developer (Freelance)

03/2023 – Present

- Developed custom web applications for a variety of clients, including startups, SMEs, local government units, and students requiring project assistance, delivering functional and practical solutions tailored to specific needs.
- Government Information Systems: Built platforms for document tracking, citizen registration, and budget monitoring, improving efficiency for small municipal offices.
- Educational Tools: Designed systems for student information management, event coordination, and capstone project monitoring for schools and universities.
- Freelance Student Projects: Collaborated with students to conceptualize and develop academic projects, including library systems, inventory systems, and scheduling tools, ensuring compliance with academic requirements.
- Proficient in PHP (Core and Laravel), with experience in integrating databases (MySQL) and creating user-friendly interfaces using frontend technologies like HTML, CSS, and JavaScript.
- Delivered projects within tight deadlines, optimizing workflows to ensure timely completion while maintaining functionality and quality.
- Assisted clients in defining project scopes and requirements, achieving a high satisfaction rate by providing reliable, easy-to-maintain solutions.
- Gained hands-on experience working on small-scale government initiatives, contributing to the digitization of local processes like community project tracking and resource allocation.

EDUCATION

Bachelor of Science in Information Technology

2026

- **Relevant Courses:** Relevant courses on Full Stack Web Development, Mobile Application, Event Driven Programming, and other practices.
